## **Municipal Infrastructure Gap**

My question is for the Minister of Municipal and Community Affairs. Everyone has acknowledged that there is a municipal infrastructure gap; however, the most recent numbers that are publicly available on the size of that gap are from 2014. My question is, can the Minister provide an updated analysis of the municipal infrastructure gap, and the year in which it was completed, as follows:

1. What is the current gap by community;
2. What is the current municipal infrastructure gap by community as it relates to operations and maintenance funding;
3. What is the current municipal infrastructure gap by community as it applies to water and sewer funding, or as it is now called, environmental funding; and
4. What is the current municipal infrastructure gap by community as it applies to capital funding, or as it is now called, CPI and Gas Tax?
