Notes:

1. Figures from the NWT Bureau of Statistics on a calendar year basis (see: <https://www.statsnwt.ca/economy/minerals/Annual%20Mineral%20Production2019.xlsx>)
2. "Other Minerals" includes production values of tungsten, copper, sand, gravel and stone.
3. Royalties reported are on a fiscal year basis. Figures 1999 to 2014 sourced from federal public accounts and include NWT and Nunavut. Figures 2015 to 2019 sourced from NWT public accounts and cover the NWT only. Separation of mining and petroleum royalties not available due to legislated disclosure limitations. Individual company payments to the federal, GNWT and Indigenous governments available on the federal *Extractive Sector Transparency Measures Act* registry at: <https://www.nrcan.gc.ca/our-natural-resources/minerals-mining/mining-resources/extractive-sector-transparency-m/links-estma-reports/18198> however there are issues with the quality and consistency of this self-reported data from 2016-2020.
