MLA, NUNAKPUT

Oral Question 31-19(2) Response to Progress of Government

This letter is in response to your Oral Question of February 7, 2020, regarding the progress of government and your request for confirmation of current infrastructure projects in your constituency. For your information, the enclosed document (Appendix A, B & C) lists Standing Offer Agreements, other contracts in Nunakput communities, and current GNWT capital projects (small and large) in your constituency. Please note that there is some overlap between the projects listed in appendices B and C, as capital projects that have gone through the procurement process are identified in both tables. Additionally, Appendix D references projects that have been included on community government capital plans.

In addition to the projects and Standing Offer Agreements listed, it should be noted that there are a number of Government of the Northwest Territories' (GNWT) programs that use local contractors. The Department of Infrastructure develops a detailed Deferred Maintenance Plan each fiscal year and uses a combination of existing resources and private sector contractors to carry out the required work. Additionally, while the Capital Asset Retrofit Fund (CARF) Program is used to upgrade existing GNWT buildings that are not currently deemed energy-efficient, on occasion, these energy-related projects are coupled with Deferred Maintenance Program projects to take advantage of economies of scale and cost-effective project delivery.

Thank you.
